

Alex Morgan

Software Engineer I | Full-Stack Developer

• +1 555 010 0000 • alex@example.test • linkedin.example.test/in/alexmorgan • github.example.test/alexmorgan

Summary

Software Engineer with experience building high-performance, scalable applications for digital platforms. Skilled in TypeScript, JavaScript (ES6+), React, Next.js, and Node.js. Strong background in designing REST and GraphQL APIs, modular component development, test-driven development (TDD), and optimizing SEO performance metrics (Core Web Vitals). Experienced in CI/CD pipelines, containerization (Docker, Kubernetes), accessibility best practices, and Agile collaboration.

Experience

Full-Stack Developer

Example Web Technologies

2024–Present

- Built and optimized applications using React.js, Next.js, TypeScript, and Node.js, focusing on scalability and high-performance digital platforms.
- Designed and consumed RESTful and GraphQL APIs, ensuring secure, seamless integration and efficient data flow.
- Applied TDD with Jest and functional testing, delivering reliable features and improved development efficiency.
- Developed modular components with React Hooks and Material UI, aligning with design tokens for consistency and accessibility best practices.
- Deployed applications on AWS using Docker, Kubernetes, and GitHub Actions CI/CD pipelines, improving delivery speed and scalability.

Key Projects

- Insights Platform** – Social media analytics and forecasting platform. Built GraphQL API services, integrated payment subscriptions, deployed via Docker/Kubernetes on AWS.
- AdGen** – AI-powered content and ad generator using Next.js, Redis caching, and scalable microservices with automated CI/CD pipelines.
- CampaignFlow** – Marketing automation tool with Node.js, REST APIs, third-party graph APIs, and containerized deployments improving campaign insights and scheduling.

Projects

- ChatConnect – MERN, Realtime, Sockets**
Real-time chat platform with messaging, multimedia sharing, groups, and feeds. Implemented authentication, microservices, GraphQL queries, and deployed on cloud infrastructure.
- TeamSync – SERN, Tailwind, SQL, Docker**
Team management system with project assignment, leave tracking, and analytics. Integrated chat APIs, CI/CD, and documented UI components in Storybook with accessibility checks.

Technical Skills

Frontend: TypeScript, JavaScript (ES6+), React.js, Next.js, Hooks, Material UI, Tailwind CSS, SEO Optimization, Accessibility, Storybook

Backend & APIs: Node.js, Express.js, Django, Flask, REST, GraphQL, Microservices, Authentication, Redis, MongoDB, PostgreSQL, SQL, Firebase

DevOps & Tools: AWS, Docker, Kubernetes, CI/CD (GitHub Actions), Terraform, Jest, Unit Testing, Figma, Agile, Git, Postman

Education

Bachelor of Technology (Computer Science Engineering) – Example University

2020–24

Higher Secondary (PCM) – Example Senior Secondary School

2018–20

Class 10 – Example Public School

2016–17

Certifications

– Backend Development – Example Academy • React.js Training – Example Institute • Hackathon Finalist – Example Event

Soft Skills and Interests

Collaboration • Problem-Solving • TDD & Testing Mindset • Continuous Learning • Passion for Product
